Proposal Theme (in English)

Enhancing IT Operational Efficiency by 70% Through the Development of a Fully Integrated IT Ledger System

Explain How your Theme May Impact Company Strategic Initiative (in English)

The **Complete Integrated IT Ledger** will streamline IT operations by consolidating and automating the management of key IT records.

Currently, records like assets, user accounts, emails, network settings, roles, and policies are managed separately, which is time-consuming and prone to errors.

IT staff will be able to manage and monitor all areas from a single platform, improving service quality while reducing manual effort.

This initiative will enhance IT efficiency, align with the **company's strategic goals**.
